

Dancing Flames Soy Candles

WICK TARGET

For Perfectly Centered Wicks

Directions for use:

First use this target to determine the diameter of the candle jar you will be using.

Then find the size of wick suggested for that size of jar.

Example, if the jar is 3 inches in diameter, then use a wick that is suggested for jars 3 inches in diameter.

If you have a wick that is large enough to make a proper burn pool to the edge of the glass, you can use two smaller wicks in the center of the container.

Use the red lines as guides for proper placement of wicks.

Can also be used to place 3 wicks in a larger jar.

I recommend laminating or putting this page in a heavy duty page protector to keep it clean.
